Beal Park Phase 3

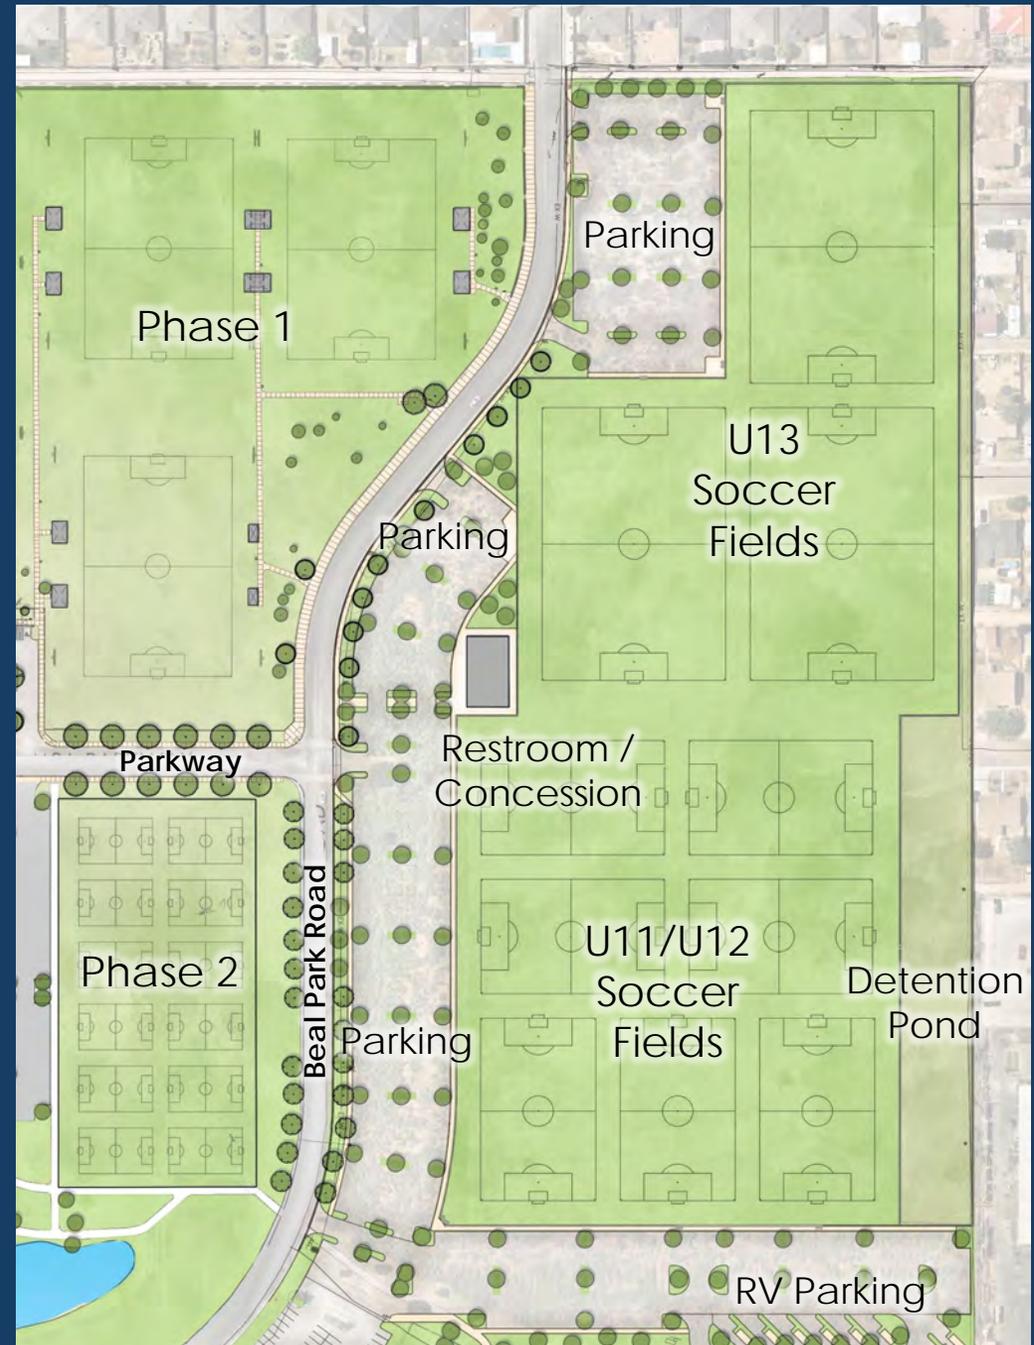

Timeline:

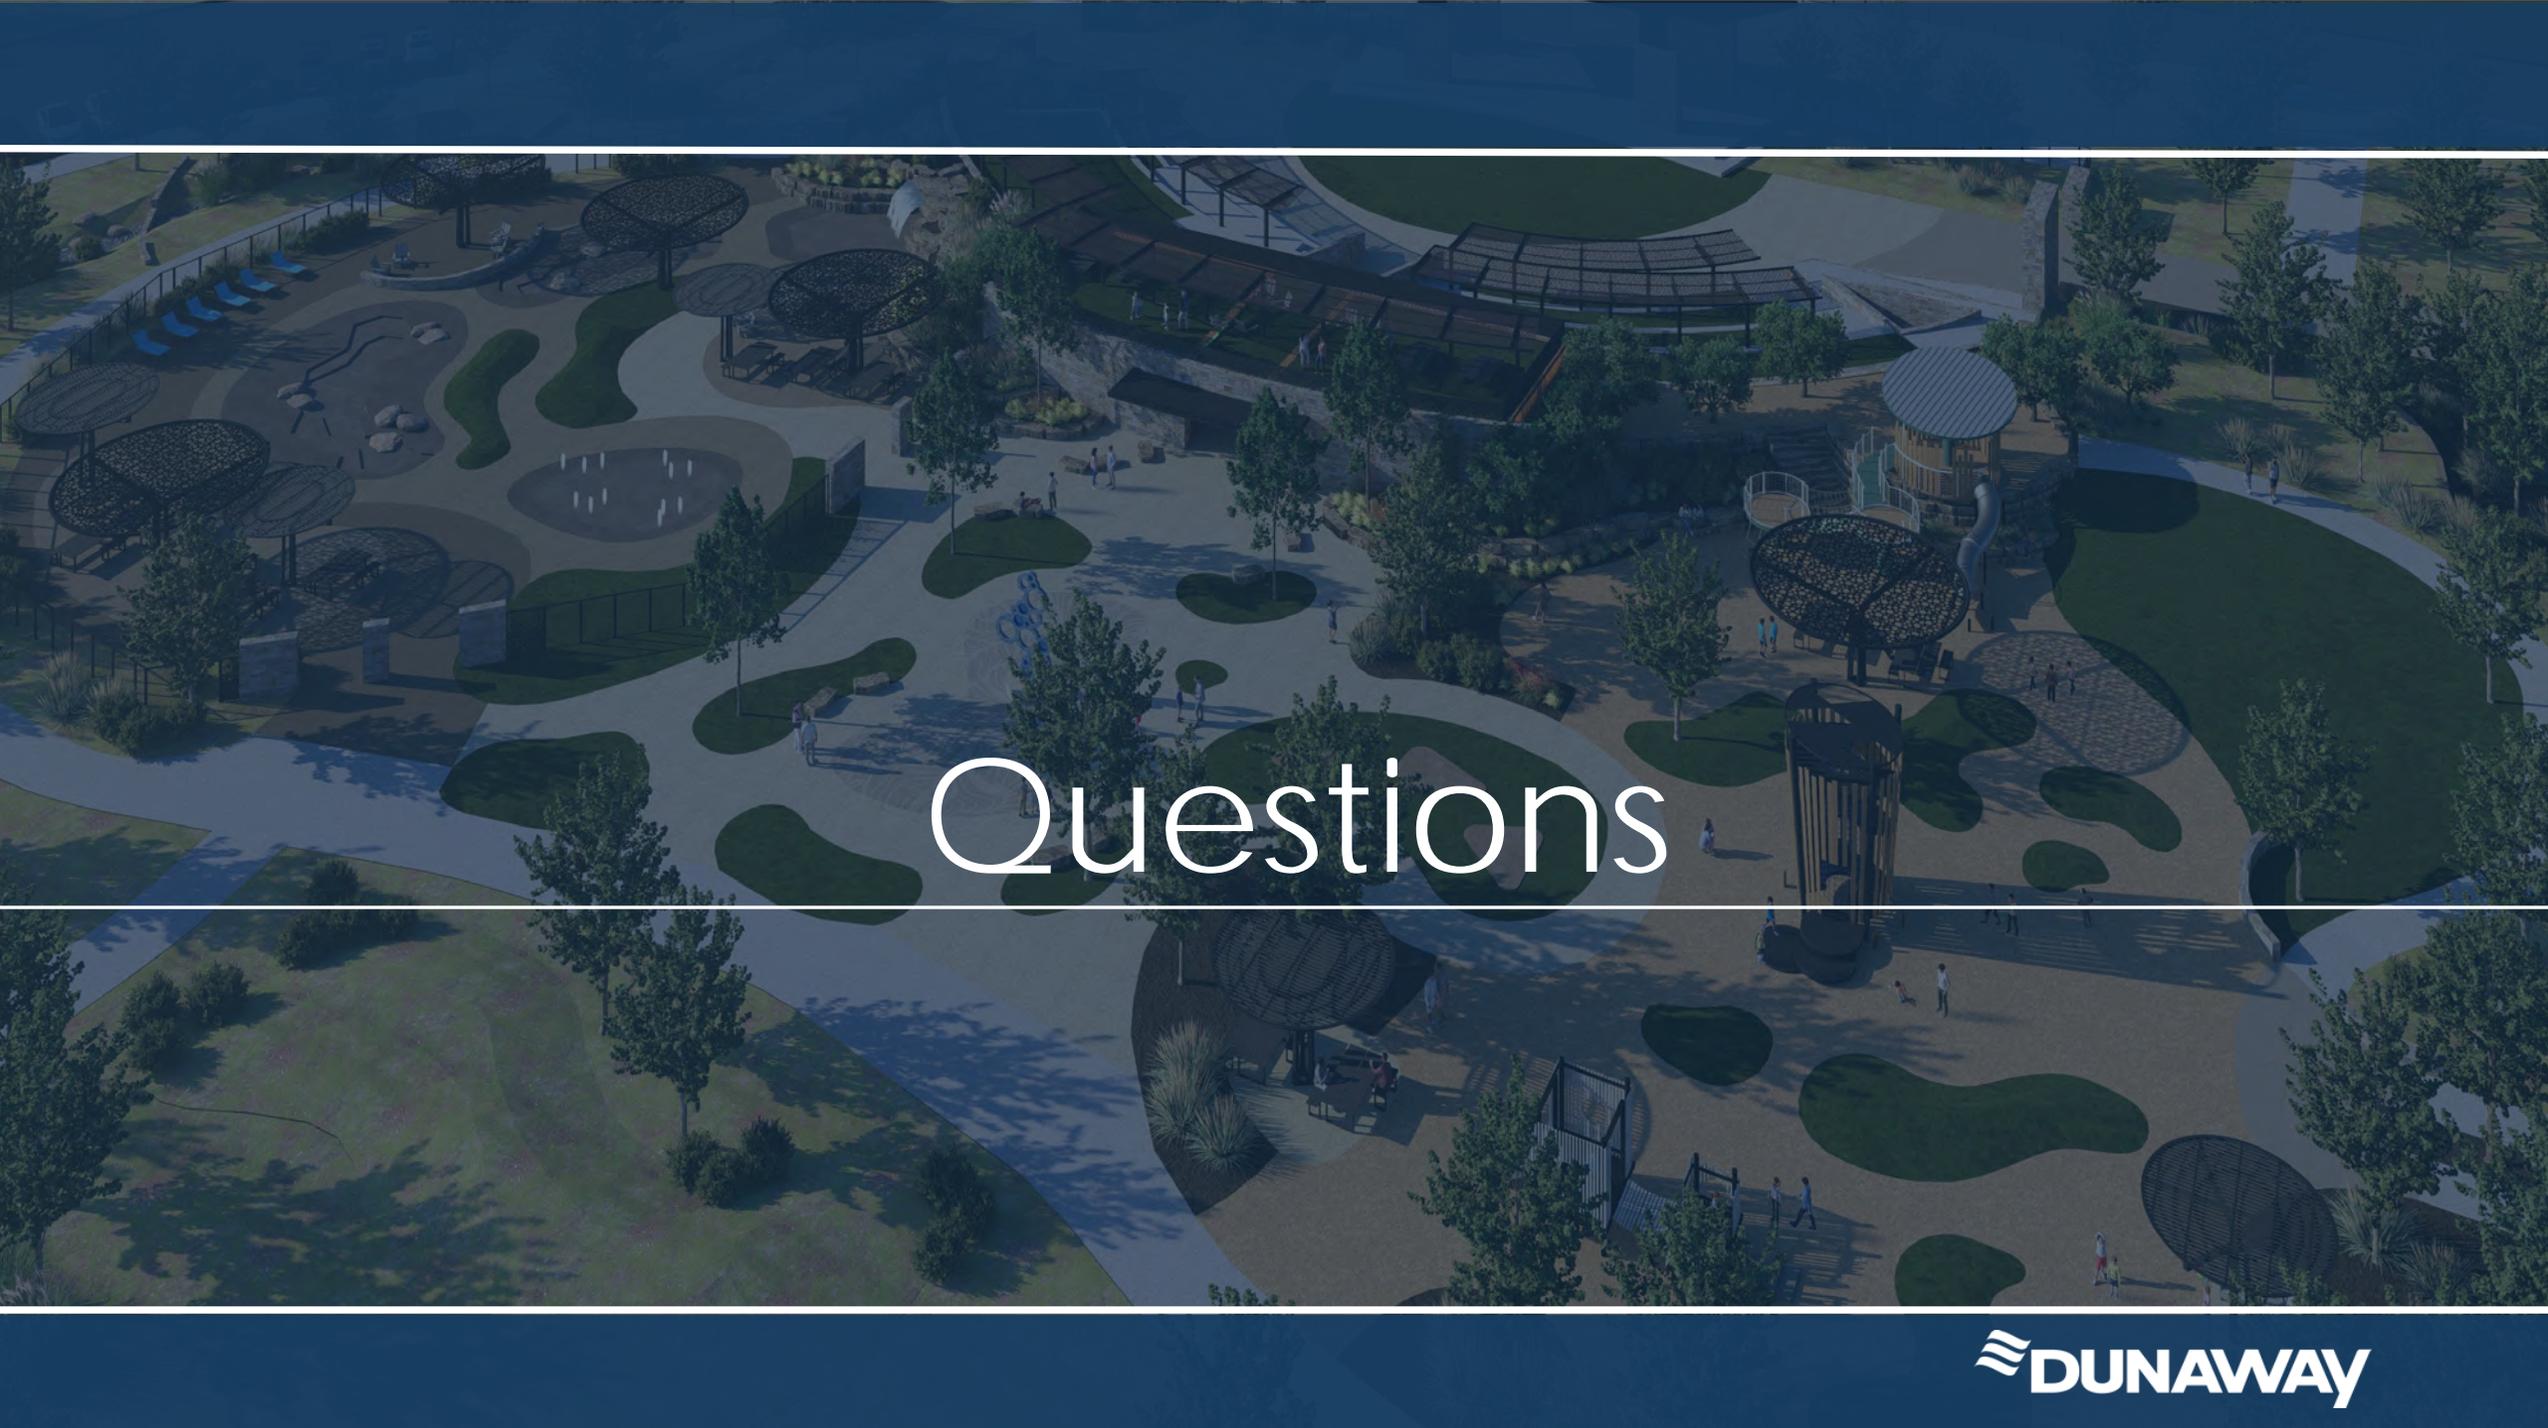

Design: Summer '26 – End of '26

Construction Complete: End of 2027

Proposed Program:

- (7) U11/U12 Soccer Fields
- (3) U13 Soccer Fields
- 15 RV Parking Spaces
- 1,110 Parking Spaces
- Restroom / Concession

An aerial architectural rendering of a modern park. The park features a complex network of winding paths, numerous trees, and several large, circular, perforated metal structures that serve as shade or play elements. There are also various play structures, including slides and climbing frames, and a large, curved, covered seating area. The overall design is organic and integrated with the natural landscape.
